JoAnn,

Can we get some additional time seeing that this is an ER? This is still a moving target. Yes on 300K. Thanks.

Hi –

I need the IGCE and Sow for this – Do you need to add the extra \$300,000 approved by Carl?  
thanks

At 0930 CDT the REOC tasked the ERRS contractor to begin sourcing activities to potentially

provide alternative water supply to the New Mexico communities impacted by the Gold Kill Mine Spill. Alternative water supply needs may include domestic water, irrigation and livestock watering. The ERRS contractor will evaluate cost, availability and logistics for delivery. The ERRS contractor will not make any cost commitments until we let them know what the exact needs are. Jon Rinehart will be working with the San Juan County Emergency Management and NMED to identify needs.
